Export Summary

The export value of U.S. dairy, livestock, and poultry commodities and dressed hides and skins, including leather, totaled more than $3.5 billion during January-September 1986, 7 percent above the same 1985 period. Nearly all of the major commodity groups, such as variety meats, beef, pork, hides and skins, nonfat dry milk and poultry products contributed to the increase. Animal fats and oils, butter, and cheese were the major groups that showed declines resulting from decreased volume and/or lower unit prices. The quantity of live animal exports for breeding decreased 22 percent, but the value increased 15 percent. Cheese, butter, and table egg exports declined substantially, both in volume and value. Nonfat dry milk (NDM) exports gained 10 and 12 percent in volume and value, respectively.

The projected value of calendar year 1986 exports of dairy, livestock, and poultry commodities and dressed hides and skins is expected to rise about 9 percent over 1985. Some of the major commodity groups which performed well in the first 9 months of 1986, such as beef and cattle hides, are expected to continue to do well in both volume and unit price. Export volume of NDM in the fourth quarter of 1986 is projected to show strong gains, primarily due to large sales to Brazil, Mexico, and Austria.

Commodity Highlights

Red Meats - Exports of red meats (beef, veal, and pork) during January-September 1986 increased 14 percent in volume and 18 percent in value. Shipments to all destinations (nearly 90 countries) totaled over 136,000 metric tons worth over $498 million. Beef and veal exports gained 34 percent in volume and 20 percent in value over the same 1985 period. Pork exports declined 40 percent in volume , but gained 10 percent in value. Japan continued to be the No. 1 market for beef and pork, accounting for nearly 75 percent of the value of U.S. red meat exports. Exports of beef to Brazil under the Dairy Termination Program reached 15,000 tons valued at $9.9 million.

Variety Meats - Exports of pork, beef, and veal variety meats during January-September 1986 totaled nearly 179,000 tons, down 1 percent, and had a value of $239.5 million, up 10 percent from 1985. Japan, France, Mexico, Egypt, the United Kingdom, and Canada were the top individual markets for U.S. variety meats, accounting for over 83 percent of the total by value. Major increases were registered by Japan and the United Kingdom while significant declines were seen in Canada and Mexico. The European Community (EC) market still accounted for approximately 33 percent of U.S. variety meat exports during 1986.

Animal Fats and Oils - During January-September 1986, the volume of U.S. exports of all animal fats and oils was 922,166 tons, an increase of 1 percent over the same 1985 period, while the export value declined 32 percent to $299.6 million. Excessive inventories of domestic products coupled with

record production and inventories of palm oil have kept unit prices at near-record low levels during the first half of 1986. However, tallow prices in the third quarter showed some improvement, reaching year-earlier levels. Current prices are expected to hold firm for the balance of Calendar Year 1986 due to a reduction in inventory of animal fats and palm oil.

Inedible Tallow - During January-September 1986, U.S. inedible tallow exports were 837,434 tons, valued at $263.2 million, down 1 percent and 32 percent, respectively, from the same 1985 period. The top 10 markets accounted for two-thirds of the 1986 exported volume and 59 percent of the value. Six of the top 10 showed a decline in 1986 imports of which USSR down 32,000 tons, was the major one followed by Egypt (-12,000), Korea (-11,000), and the Netherlands (-8,000). Of the four with gains, Spain was the leader with 36,000 tons, more than a 100-percent gain over 1985.

This dramatic increase in Spain's imports is likely the result of the EC import quota on U.S. inedible tallow. The EC restricted imports of U.S. inedible tallow to 93,625 tons for the 10 existing EC members for 1986. Spain's imports were not restricted, even though it recently joined the EC. Although direct U.S. exports of inedible tallow to the EC will be down severely in 1986, a further increase in Spanish imports may occur. A portion of these imports may have been transshipped to those EC members that are under the quota.

Edible Tallow - U.S. exports of edible tallow totaled 21,876 tons valued at slightly more than $8.2 million, for an increase of 20 percent in volume, but a decline of 5 percent in value over the same 1985 period. Mexico accounted for nearly 45 percent, followed by Canada and Colombia with market shares of 20.7 and 12.2 percent, respectively.

Lard - The value of U.S. exports of lard during January-September 1986, totalling $17 million, was down 6 percent from the same 1985 period, despite an 11-percent increase in volume to 35,258 tons. Mexico accounted for 86 percent of the U.S. lard exports during during January-September 1986 and should remain the No. 1 market for U.S. lard throughout the remainder of the year.

Cattle Hides - Whole cattle hide exports to all destinations (44 countries) during January-September 1986 totaled over 20 million pieces, valued at more than $917 million. Export volume gained 5 percent, but the export value was 21 percent higher than the same 1985 period because the average price per exported hides increased 15 percent ($45.17 versus $39.35). The top 10 markets accounted for 94 percent of the value of hide exports although three (China, Romania, and Mexico) recorded substantial sales declines of $12 million, $17 million, and $31 million, respectively.

Korea remained the top market, accounting for over 38 percent of the export value. Japan was second with a market share of 25 percent. Others in the top 10, with market share percentages in parentheses, were: Taiwan (13.2); Italy (6.0); Mexico (3.7); Canada (2.2); Romania (1.8); China (1.5); Czechoslovakia (1.4); and Yugoslavia (1.0).

The price gains which began in the second half of 1985 continued through most of 1986, pushing average prices to new levels; $45.17 versus the previous third-quarter high of $42.74 in 1984.

Cattle slaughter in calendar year 1986 is expected to be about the same as in 1985. Assuming no change in slaughter but with continued strong export demand and softer dollar against major currencies, prices of hides should hold firm for the balance of 1986. In the early part of calendar year 1987 slaughter is expected to show a decline which could result in further price gains for cattle hides.

Pig and Hog Skin - Exports of pigskins during January-September 1986 increased from the same 1985 period. Export volume was nearly 2.9 million pieces, valued at $9 million, up 27 and 31 percent, respectively. Taiwan, with a 32-percent market share, was the No. 1 export market, followed by Mexico, (30 percent); Yugoslavia, (16 percent); and Venezuela, (11 percent). Pigskin exports during 1986 are expected to show continued improvement over 1985, but will remain well below the 1984 level of 6 million pieces because U.S. suppliers have cut back on production.

Leather - Exports of leather to all destinations (68 countries) during January-September 1986 totaled $224.7 million, 1 percent below the same 1985 period. The top 10 leather markets accounted for 82 percent of all U.S. leather exports. Korea became the No. 1 market with a market share of 20 percent, followed by Canada with a 15-percent share. Others in the top 10, with market share percentages in parentheses, were: China (10.7); Italy (8.4); Hong Kong (6.4); Japan (5.8); Taiwan (5.3); the Dominican Republic (3.9); the Philippines (3.8); and West Germany (3.2). Mexico, although near last year's level of almost $6 million, failed to make the top 10 for the first time in many years.

Upholstery Leather - Exports of this commodity decreased nearly 23 percent in volume and 17 percent in value during January-September 1986 over the same 1985 period. Canada and Japan accounted for 97 percent of the nearly $32 million total. Canada's market share was 63 percent and Japan's was 34 percent.

Wet Blue - Exports of wet blue during January-September 1986 totaled $72.4 million, 24 percent below the same 1985 period. China, down nearly $30 million, accounted for the decline. Wet blue exports accounted for 32 percent of the total leather exported. The top five markets accounted for 81 percent of total wet blue exports. China was No. 1 with a 32-percent market share, followed by Italy with 21 percent. The other three markets and their market shares were: Korea (15.0); Hong Kong (7.7); and West Germany (5.2).

Pig Leather - Exports during January-September 1986 were up 6 percent in volume and down 30 percent in value compared with the same 1985 period. The price per square foot averaged 47 cents in 1986, compared with the previous

year's average of nearly 72 cents. The top three markets (Canada, Japan, and the United Kingdom) accounted for over 66 percent of the nearly $1.9 million total. Canada was the largest market with a 32-percent share.

Mohair - Exports of mohair during January-September 1986 totaled nearly 4,200 tons, valued at more than $32 million--an increase of 47 percent in volume and 13 percent in value from the same 1985 period. The United Kingdom continued to be the most important market for mohair, accounting for two-thirds of total exports. Other markets of importance include Japan, Belgium, Spain, France, West Germany, and Italy.

Mink Pelts - Exports of mink pelts during January-September 1986 increased 19 percent in volume and 10 percent in value compared with the same 1985 period. Volume of "dressed and undressed" pelts in 1986 was 3,510,332 pieces, and the value totaled $96.5 million. Both the dressed and raw pelts registered gains in volume and value. Undressed pelt prices averaged 9 percent less in 1986 than in 1985; dressed pelts averaged 4 percent less.

The top 10 markets accounted for 92 percent of the export value. Canada was the top buyer with an 18-percent market share, followed by West Germany with over 17 percent and Switzerland with 13 percent. Others in the top 10, with their market share in parentheses, included: Hong Kong (10.8); Japan (10); the United Kingdom (6.8); Korea (5.6); Italy (3.3); the Dominican Republic (4.1); and Spain (2.8).

Mink pelt production in 1985 declined for the first time in many years, dropping below the 4.2 million level following several years of steady growth. Unless auction prices firm or improve substantially in 1987 there is a danger that production could drop back to the 1980 level of 3.5 million.

Dairy Breeding Cattle - Exports of dairy breeding cattle during January-September 1986 totaled 30,715 head, valued at $44.5 million--7 percent fewer in number and 18 percent more in value than the same period in 1985. Shipments to Mexico represented nearly 56 percent of all U.S. dairy cattle exports. Other top markets, by volume, include: Canada; Venezuela; Saudi Arabia; and Taiwan.

Beef Breeding Cattle - Exports of beef breeding cattle during January-September 1986 totaled 15,382 head with a value of $24.5 million. These figures represent a decline of 41 percent in volume and 18 percent in value, respectively, compared with the same 1985 period. Mexico, the No. 1 market, accounted for 77 percent of total exports despite the fact that its 1986 imports from the United States declined by nearly 11,000 head, (48 percent below the same 1985 period).

Bull Semen - Semen exports to 60 countries totaled nearly $19.7 million during January-September 1986, up 18 percent from the same 1985 period. The EC continues to be the leading market, with a 39-percent market share. Individual countries showing significant gains include: Italy, Netherlands, Canada, Venezuela, Poland, and Hungary. Markets showing significant declines were France and Switzerland.

Horses, Breeding - Exports of horses for breeding during January-September 1986 totaled 1,031 head, valued at over $20.9 million; a decrease of 22 percent in volume and an increase of 74 percent in value, respectively, from the same 1985 period.

Markets with imports valued over $500,000 were: Brazil, $9.0 million; France, $1.4 million; Ireland, $1.3 million; Republic of South Africa, $1.3 million; Sweden, $1.2 million; Japan, $1.2 million; Mexico, $.758; Denmark, $.698; Italy, $.687 and Federal Republic of Germany, $.517.

The average unit value of breeding horses exported was $20,325. Major countries importing horses, by value, were: Ireland, $275,000; France, $242,468; Brazil, $211,030; Japan, $47,019; Republic of South Africa, $27,621; and Sweden, $25,856.

Swine - Breeding swine exports during January-September 1986 totaled 10,285 head, valued at $7.4 million. These figures represent a drop of 21 percent in volume and an increase of 31 percent in value compared with the same 1985 period. Major export markets were: China, 3,291 head; Mexico, 1,335 head; Japan, 1,561 head; and Korea, 618 head. China was No. 1 with a market share of 32 percent, followed by Japan and Mexico with 15 and 13 percent, respectively. Export declines were recorded for Mexico, 1,495 head; Canada, 817 head; and Korea, 483 head. These were offset in part by small export gains to Dominican Republic, Barbados, Netherlands Antilles, Peru, Chile, Malaysia, Singapore, and Indonesia. The increase in export value was due to the nearly 67-percent gain in the average unit price, up from $429 in 1985 to $718 in 1986.

Poultry, Eggs, and Products - Exports of these commodities during the first 9 months of 1986 totaled $354.7 million, a 25-percent increase over the same period in 1985. Poultry meat totalling $213 million accounted for 60 percent of the export value of poultry, eggs, and products. Increases in exports were registered in chicken meat and egg products. The value of egg and egg product exports was $37.6 million, a 70-percent increase for total egg exports despite an 16-percent decline in the shell egg exports. Strong competition from other supplying countries such as EC members continue to impede U.S. exports. However, the decreased value of the U.S. dollar has improved our trading position.

Chicken meat was valued at nearly $186 million of which chicken parts accounted for $159 million. The following six chicken parts markets, with the market share percentage in parentheses, accounted for over 78 percent of the volume of exports: Japan (28); Hong Kong (17); Singapore (11); Jamaica (11); Mexico (6); and Egypt (5). The introduction of the Export Enhancement Program (EEP) for frozen poultry to Egypt resulted in an 168-percent increase in volume of poultry parts to that market raising it from ninth place in 1985 to seventh this year.

Eggs and Egg Products - Exports of egg products and eggs for hatching were up sharply while exports of shell eggs for table use were down. Exports of table eggs dropped 26 percent in volume and 16 percent in value. The lower figures reflect the increased competition from the EC, in particular France and Netherlands. Egg product exports during the first 9 months of 1986 were over $31 million, a 116-percent increase in value, while the volume was reported at 20,552 tons, a 141-percent increase. Japan and Canada accounted for approximately 91 percent of the trading. Japan continues to be the No. 1 customer with purchases totaling $26.5 million or 85 percent of total exports.

In 1986, exports of poultry, eggs, and products are projected to be 20-25 percent above 1985 levels in value.

Section 416 Program Update

During October 1, 1985-September 30, 1986, signed commitments to donate U.S. dairy products under Section 416 totaled over 98,000 tons. Nonfat dry milk accounted for 66 percent of the donated dairy products, followed by butter oil and cheese at 16 percent each, and butter at less than 2 percent. These donations are designated for shipment to 12 countries (table 1). Mexico was the largest recipient with a 44-percent share followed by Poland with 12 percent and Brazil over 10 percent.

USDA EXPORT RESPONSIBILITY UNDER DAIRY TERMINATION PROGRAM--UPDATE

Background: USDA has been mandated by Congress in Section 104, parts 2 and 3 of the Food Security Act of 1985 to purchase and distribute 200 million pounds (90,719 metric tons) of red meat, to minimize the adverse effect of the Dairy Herd Buy-Out Program (effective dates: April 1, 1986, to October 1, 1987) on U.S. beef, pork and lamb producers. The Secretary of Agriculture shall use funds available through the Commodity Credit Corporation (CCC) to purchase the 200 million pounds of red meat. The legislation limits the meat distribution to the Department of Defense (DOD) and/or the export market.

APRIL 18 USDA announces it will supply to the DOD up to 20,000 tons (44 million pounds) of red meat between July 1, 1986 and October 1, 1987. Update: First shipment of product to DOD commissaries departed the U.S. on Oct. 25, 1986. Two supply contracts with DOD exist, one for 8 million pounds of chilled (retail ready) beef for delivery Oct. 1, 1986, thru April 1, 1987, and the supply of 4 million pounds of bulk/beef patties to the Army-Air Force Exchange System (AAFES) for the period Oct. 1, 1986, thru Oct. 1, 1987.

MAY 1 USDA annouces the CCC is seeking tender offers from the EC to purchase U.S. high-quality beef (HQB) to count toward fulfilling the current annual EC quota of 10,000 tons of HQB. Total quota available under May license issuance was 1069 tons. (Update: 19 bids were received under the announcement and all rejected because of technical letter of credit considerations).

MAY 14 USDA announces the sale to Brazil of 90,000 tons (198.4 million pounds) of beef for July-October 1986 delivery period. This sale provides U.S. beef at an f.o.b. on vessel price of $655 per metric ton.

JUNE 30 USDA announces the CCC is seeking tender offers from the EC to purchase U.S. HQB under a second invitation. Total quota available under this announcement is 8,514 metric tons. EC HQB import licenses expire Sept. 18, 1986 (last day for product to arrive in the EC).

JULY 11 USDA amendment to Brazil contract to allow carcass cut at 12/13th rib to be effective July 15, 1986 (In later discussions the Brazilians agreed to allow boxed beef to be included in the USDA procurement for Brazilian contract in quantities not to exceed 20 percent of total contract, 18 million pounds with supply at USDA option).

AUGUST 5 USDA announces the sale of 825 metric tons (1,818,000 pounds) of HQB with a value of $3,734,000 to EC importers under Invitation II for $1,988,000, or on average, $1.09 per pound.

SEPT 2 USDA announces sale to Argentina of 1,000 metric tons (2,204,600 pounds) of pork sides at $755 per metric ton. Delivery, f.o.b. vessel, will be November-December 1986. AMS will procure the product according to U.S. specifications on behalf of the CCC through regular procurement invitations.

NOV 14 DOD states in a letter their desire to terminate further program participation beyond current (12 million pounds) contracts & USDA agrees

DEC 1 Brazilian Update: 145.92 million pounds (66,188 metric tons) purchased by AMS to date. Of that total approximately 16,529 metric tons (36,440,000 pounds) remains in storage. Approximately 6,600 metric tons is scheduled to be shipped Dec. 1, 1986. Additional bids for product are due to AMS on Dec. 2, 1986.

DEC 1 Argentina Update: 1.76 million pounds (798 metric tons) purchased to date by AMS. USDA plans to purchase 200 metric tons the week of December 8 to complete the contract. First U.S. port deliveries occured Nov. 21, with the next corresponding export shipment dates set for Dec. 10, 1986 and Jan. 3, 1987.

Dairy Termination Program (DTP) Update

According to USDA estimates the program continues pretty much on target. The cumulative total cattle slaughter under the program from April 1 through November 29 is an estimated 878,600 head. This total includes all cows, heifers, and calves identified as dairy animals designated for disposition in compliance with the program requirements. In addition 46,208 dairy cattle were reported identifed for export under this program during the first period. Meat purchases by USDA through December 12, required by the program, totaled 324 million pounds.

Dairy Cattle Exports Under DTP

Mexico is the leading buyer of U.S. dairy cattle under the DTP. Of the 46,208 head of DTP cattle reported for export through December 13, over 60 percent were sold to Mexico. Last year, Mexico imported 30,188 head of U.S. dairy breeding stock valued at $30.2 million, a more than threefold increase over 1984. Canada was the second largest importer of DTP cattle with over 10,500 head. Other importers include Venezuela, Ecuador, Taiwan, Colombia, Argentina, Bermuda, El Salvador, Saudi Arabia, Brazil, and Peru.

Rules for Processing Animals for Export

Effective Sept. 15, 1986, exporters must provide the port veterinarians with a list of all animals in an export shipment. The list must include, in ascending order, the number of the plastic bangle eartag along with all eartag numbers and any other identification numbers for each animal. The plastic bangle tags must each have a separate number, and it is the responsibility of the exporter to supply the bangle tags. This list is intended to supplement VS Form 17-140. Use of this list with the bangle tags in numerical order will facilitate the processing of animals and eliminate a great deal of time spent searching for information on animals in the shipment by the port veterinarian. The port veterinarian can compare the list supplied by the exporter with the VS Form 17-140 or other U.S. origin health certificate prior to inspection of the animals for health and identity.

Market Opportunities

Cattle bones to Japan - An opportunity exists for exports of U.S. cattle bones to Japan. Photographic film makers depend heavily on gelatins processed in Japan from imported cattle bones for their film production. Although total gelatin requirements for photographic film production is not known, Japan imported 78,108 metric tons of bones from the United States in 1985. Raw or semi-processed bone imports must be certified by the Veterinary Services, Animal and Plant Health Inspection Service on VS Form 16-4. There are no quota or tariff restrictions on cattle bone imports to Japan.

Sheep to India - According to off-the-record information from GOI officials, India is planning to buy another 1,200-1,300 Rambouillet sheep from the United States around February-March 1987. This batch is expected to include some 300-400 rams. Tender notification for the sheep purchase will be offered by the India supply mission, Washington, DC, in December 1986, and a GOI team will be in the United States around February to complete the purchase. The team is expected to buy 18-month-old breeding rams which will be tested for breeding performance before their selection.

Exporters must make certain that sheep will satisfy GOI requirements and be free from any disease, existing or dormant.

Australia is actively competing in this area. According to unofficial information, Australia may be donating 1,000 Merino sheep (mostly rams) to India in the near future, and about 350 Dorsets (meat-type breed).

Tallow to Brazil - The GOB customs policy commission (CPA) through resolution number 05-1092 published on Dec. 9, 1986 has reduced the "ad valorem" duty from 55 percent to zero on the balance of the 50,000-ton import quota for tallow (N.B.M. code 15.02.01.02) which was established by resolution 05.10.30, dated Aug. 19, 1986. This resolution is valid until March 31, 1987.

Leather to Korea - Korea is rapidly becoming the leading supplier of leather garments, athletic shoes, and personal leather goods. Materials for this expanding leather goods industry is imported. Korea is importing about 10 million cattle hides in 1986 , mostly from the United States, to supply its expanding tanneries. In addition Korea imports about $300 million worth of finished leather, but about 50 percent of it is from Japan and only about 15 percent from the United States.

However, due to the recent appreciation of the yen and a change in GOK policy to encourage deversification in supply sources, the United States should be able to expand its market share. This shift resulted from the fact that Japan has a $5 to $6 billion trade surplus with Korea while the United States has a $7 to $8 billion trade deficit with Korea.

To help reverse this trade imbalance leather was one of the products identified for a switch from Japan to the United States. In fact, ovine leather is already on the list which importers may not buy from Japan. There is also a "jawboning" campaign to switch other leather purchases from Japan to the United States.

In view of these circumstances it appears that U.S. tanners have an excellent opportunity to expand U.S. market share. But it will require more intense effort and a strong industry commitment.

Poultry Breeding Stock to Nigeria - It would be appropriate to permit GSM-102 financing for poultry stock, since imports of Grandparent stock are permitted. There is no particular reason for USDA to specify that chicks must be Grandparent stock to conform with Nigerian import regulations. The U.S. Agricultural Attache thinks that it will be very difficult for Customs officials to differentiate between Parent stock and Grandparent stock chicks.

Market Development Activities

A. Planned:

Feed Seminar - During the first quarter of FY 1987, Milk Replacer/Starter seminars will be conducted in Korea jointly by the National Renderers Association, the Korean Swine Association, and the Borden Company of Korea. Seminar topics will focus on introducing a new fat enriched product for piglet starter rations.

TCA in Mexico - In 1986 the Tanners' Council of America (TCA), jointly with FAS, participated in the "ANPIC '86" leather show in Leon, Mexico. The response was encouraging and for that reason TCA/FAS will participate in "ANPIC '87" scheduled for Feb. 21-24, 1987.

The TCA will also repeat its "Leather World 1986" Show held in New York City in March 1986. "Leather World 1987" is scheduled for Feb. 8-9, 1987. Information brochures were sent to 25,000 manufacturers and retailers of the leather accessories, garments, footwear, and upholstery. Exhibitors and trade visitors will be foreign and domestic.

Market Access Issues

Malaysia Tariff Changes - The 1987 Malaysian budget proposed tariff changes on export duties of crude palm oil. Citing the need to be more competitive and to move excess supplies of palm oil, the Government reduced the marginal rate of duty by 20 percent and increased the price bands to M$50 per ton from M$49.21.

The export duty structure is:

On the first M$500/ton	nil	nil
Plus the next M$50/ton	10 percent	30 percent
Plus the next M$50/ton	15 percent	35 percent
Plus the next M$50/ton	20 percent	40 percent
Plus the next M$50/ton	25 percent	45 percent
Plus on the balance	30 percent	50 percent

The duty changes will have a nominal immediate impact as a result of low prices. The duty structure for processed palm oil was suspended Aug. 29, 1986.

Poultry Banned for Importation to Nigeria - The following is a listing of dairy, livestock and poultry products which are prohibited for importation into Nigeria. The list includes Nigerian tariff numbers, which are based on the Brussels tariff nomenclature (BTN). This list was published in the manual on eligible transactions, documentation processing, guidelines, and sanctions published by the Central Bank as part to the regulations for the second time Foreign Exchange Market, which became effective on September 29.

Import Prohibition (Trade)

1. Live or dead poultry, that is fowls, ducks, geese, turkeys and Guinea fowls (excluding Grandparent and foundation stocks for research and multiplication purposes (10.05) (2.02)

2. Eggs in shell, including those for hatching (04.05)

Exchange rate: ECU = US$1.035 as of Sept. 3, 1986.

Export Financing

GSM-102 Export Guarantee Program - As of Dec. 5, 1986, nearly $2.8 billion of fiscal 1987 credit guarantees were approved for all agricultural products under this program. The following table shows total guarantee commitments and guarantees approved to date for dairy, livestock, and poultry products for fiscal 1987.

Table 3--GSM-102 Financing for Dairy, Livestock, and Poultry Products

COUNTRY	COMMODITY AND CREDIT PERIOD 1/	TOTAL COMMITMENTS	GUARANTEES APPROVED
		($ million)	
Ecuador	Tallow (36)	5.00	2.50
	Breeder Stocks (36)	1.00	0.50
